Honolulu SAFER STREETS

The Opportunity

The City and County of Honolulu Complete Streets Office has launched the **Honolulu Safer Streets** initiative. The project aims to improve safety for all roadway users along several previously identified high-injury corridors in Honolulu's urban core.

The planning effort will develop traffic safety improvements for seven key corridors: **South King Street, Beretania Street, Young Street, Wilder Avenue, Piʻikoi Street, Kapiʻolani Boulevard, and Kāheka Street.**

This initiative is funded through the Federal Highway Administration's **Safe Streets and Roads for All (SS4A)** grant- a competitive federal program focused on preventing roadway fatalities and serious injuries.

How We'll Get There

Through this initiative, the City will work with our communities to identify potential street design changes and safety improvements that will prevent crashes and save lives. Public input will be solicited throughout the process through public workshops and other engagement activities.

The planning effort began in late 2025 and will continue through 2027, resulting in a set of actionable, implementable safety projects.
