

**Kaneohe Bay to Kahana Bay
Map 8 Inset 2**

*For most Tsunami Warnings, evacuate out of the red zone; in the unlikely case of an "Extreme Tsunami Warning", evacuate out of the red and yellow zones

*Remain at least 100 feet away from inland waterways and marinas connected to the ocean due to wave surges and possible flooding

*Boaters should move vessels to at least 50 fathoms (300 ft) deep and 2 miles away from harbor entrances; follow all directions from the Captain of the Port

*Structural steel or reinforced concrete buildings of ten or more stories provide increased protection on or above the fourth floor; if you are caught near the shoreline consider using vertical evacuation

*These maps do not consider the destructive effects of a locally generated tsunami. If you feel shaking, move inland immediately, well inland from the red tsunami evacuation zone

*The evacuation zone is a guideline and should be considered the minimum safe evacuation distance

1. TSUNAMI WARNING: Destructive waves from a tsunami may inundate all coastlines. Evacuate red areas
2. EXTREME TSUNAMI WARNING: In the unlikely event of an extreme tsunami waves may move significantly inland; evacuate red and yellow areas

Legend

	Fire Station		Safe Zone
	Hospital		Extreme Tsunami Evacuation Zone
	EMS		Tsunami Evacuation Zone
	Police		Major Street
	Public/Private School		Street
