For most Tsunami Warnings, evacuate out of the red zone; in the unlikely case of an Extreme Tsunami Warning, evacuate out of the red and yellow zones.

- Remain at least 100 feet away from inland waterways and marinas connected to the ocean due to wave surges and possible flooding.

- Residents should move inland at least 50 feet (15m) deep and 2 miles away from harbor entrances, follow all directions from the Captain of the Port.

- Residential buildings of ten or more stories provide increased protection on or above the fourth floor; if you are caught near the shoreline consider using vertical evacuation.

- These maps do not consider the destructive effects of a locally generated tsunami. If you feel shaking, move inland immediately, well inland from the red tsunami evacuation zone.

- The evacuation zone is a guideline and should be considered the minimum safe evacuation distance.

- Structural steel or reinforced concrete buildings of ten or more stories provide increased protection on or above the fourth floor if you are caught near the shoreline consider using vertical evacuation.
