•For most Tsunami Warnings, evacuate out of the red zone; in the unlikely case of an "Extreme Tsunami Warning", evacuate out of the red and yellow zones

•Remain at least 100 feet away from inland waterways and marinas connected to the ocean due to wave surges and possible flooding

•Boaters should move vessels to at least 50 fathoms (300 ft) deep and 2 miles away from harbor entrances; follow all directions from the Captain of the Port

•Structural steel or reinforced concrete buildings of ten or more stories provide increased protection on or above the fourth floor; if you are caught near the shoreline consider using vertical evacuation

•These maps do not consider the destructive effects of a locally generated tsunami. If you feel shaking, move inland immediately, well inland from the red tsunami evacuation zone

•The evacuation zone is a guideline and should be considered the minimum safe evacuation distance

Legend

Fire Station	Safe Zone
Hospital	Extreme Tsunami Evacuation Zone
EMS	Tsunami Evacuation Zone
Police	Major Street
Public/Private School	Street

1. TSUNAMI WARNING: Destructive waves from a tsunami may inundate all coastlines. Evacuate red areas
2. EXTREME TSUNAMI WARNING: In the unlikely event of an extreme tsunami waves may move significantly inland; evacuate red and yellow areas
